PROFESSIONAL SUMMARY

Results-oriented Full Stack Software Engineer with deep expertise in Java, Spring Boot, React, and AWS microservices archite

EDUCATION

Bachelor of Technology in Computer Science & Engineering | National Institute of Technology | CGPA: 8.8 | May 2025

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Frameworks: Spring Boot, Spring MVC, React, Next.js, Node.js, Express, Hibernate

Databases: PostgreSQL, MySQL, Redis, MongoDB

Tools & DevOps: Docker, Kubernetes, AWS, Git, GitHub Actions, CI/CD, Linux, Postman

Other: REST APIs, Microservices, System Design, Data Structures, Algorithms, Agile

WORK EXPERIENCE

Software Engineering Intern - Cloud Platforms | Tech Innovators (Jan 2024 - Jun 2024)

- Architected high-throughput microservices using Java and Spring Boot, reducing API latency by 42% for 120,000 daily active u
- Engineered distributed caching layer with Redis, decreasing database queries by 65% and saving $4,500 monthly in infrastruc
- Deployed automated CI/CD pipeline using Docker and GitHub Actions, accelerating release cycles from 3 days to 45 minutes.

TECHNICAL PROJECTS

E-Commerce Microservices Engine (Java, Spring Boot, PostgreSQL, Docker, Redis)

- Implemented distributed order processing system handling 2,500 transactions per second with 99.99% uptime.
- Engineered event-driven messaging layer with Redis pub/sub, decreasing checkout workflow drop-off by 24%.

Full Stack Collaborative Workspace (React, Node.js, TypeScript, PostgreSQL)

- Developed interactive canvas and document editor in React, supporting real-time concurrent editing for 5,000 active teams.
